## ENVIRONMENTAL RISK MANAGEMENT

Through our commercial real estate lending business, we evaluate all environmental risks associated with any investment as part of the underwriting process. Starwood Property Trust has a formal Scope of Work which requires:

- A Phase I environmental site assessment (ESA), utilized to identify environmental conditions that may have a material adverse impact on the property being assessed or its immediate surrounding area
- An assessment of a property's sustainability and marketability through the review of characteristics including, but not limited to, LEED certification, tenant amenities such as bike storage and repair facilities, neighborhood walkability ratings, and electric car charging stations
- Periodic property site visits which include physical inspection of the assets, including environmental considerations

The senior underwriter on the transaction has responsibility to ensure that the Scope of Work is followed.

Environmental assessments are undertaken by third party experts who analyze and provide their opinions on environmental risks. The third party experts are selected based on their experience with conducting environmental site assessments, national recognition, and a consistent track record of providing a high quality product that is generally well-received by Starwood, other lenders, rating agencies, and investors that rely on these reports. It is Starwood's intent to obtain a consistent level of reporting and standard formatting from a specific list of approved consultants.
